The United Kingdom is a union of four countries: England, Northern Ireland, Scotland and Wales. It is governed by a parliamentary system with its **seat of government** in London, the capital, and is a **constitutional monarchy** with Queen Elizabeth II as **the head of state**. **The monarch** of the UK also serves as head of state of fifteen other Commonwealth **realm**<sup>1</sup> countries (shown on the map below), putting the UK in a personal union with those other states.

#### The Commonwealth of Nations as of 2008

---

<sup>1</sup> **The Commonwealth**, is a voluntary association of 53 independent sovereign states, most of which are former British colonies, or dependencies of these colonies (the exceptions being the United Kingdom itself and Mozambique). The symbol of this free association is Queen Elizabeth II, known for this purpose as Head of the Commonwealth. A **Commonwealth realm** is any one of 16 sovereign states within the Commonwealth of Nations that each have Elizabeth II as their respective monarch

England and Wales, Scotland and Northern Ireland all have their own legal systems, with minor differences in law, organization and practice. English law, which applies in England and Wales, and Northern Ireland law, which applies in Northern Ireland, are based on **common-law** and **equity law** principles and are different from other European legal systems which base mainly on **Roman law** principles which apply also to Scots law.

The UK has no single constitutional document comparable to the Constitution of the United States. We say that the country has an "unwritten" or *de facto* constitution. However, the majority of the British constitution does exist in the written form of **statutes**, **court judgments** and **European treaties**.

## The Queen

According to the law the Queen is the head of the executive branch of the government, an integral part of the legislature, head of the judiciary, **the commander-in-chief of all the armed forces** of the Crown and the 'supreme **governor**' of the established Church of England.

The present monarch, Queen Elizabeth II, has reigned since 6 February 1952. She and her immediate family undertake various official, ceremonial and representational duties. As a constitutional monarch, the Queen is limited to **non-partisan** functions such as **bestowing** honours.

The Queen officially has numerous **Royal Prerogatives** (powers vested in the monarch), e.g. **the dissolution of the Parliament, the declaration of war, the calling of elections, the appointment and dismissal of ministers, the issuing and the withdrawal of passports**. However, in reality, they have been passed to politicians. They enable decisions to be taken without the backing of, or consultation with, Parliament. In practice, the Queen must follow the advice of government ministers.

The Royal Prerogative has only been used 13 times since 1947 to refuse passports, the last being 1976.

The UK has a constitutional monarchy – not an **absolute monarchy**. This means that the monarchy is apolitical and **impartial**. The work that it does in politics is largely symbolic. The work of the monarch **within the remit** of the royal prerogative is seen as being on behalf of elected ministers.

In the 19th century Walter Bagehot described the monarchy as being "symbolic and ceremonial" but with little actual power. Now this is even more true. "**The Queen reigns but does not rule**".
